

Mid-term I Rewrites:

Rewrites are possible! Here's how it works: Points can be recovered for every solution that lost more than 2 points, up to a maximum midterm score of 70/80 (roughly a B+). To prepare, review the problems and solutions carefully. For this you may work with me, classmates, and/or the QSR center staff. Once you understand the correct solution(s) email me to schedule a time for us to meet before fall break. At the meeting you will present your corrected solution(s). Bring your midterm to this meeting. While this will be more of a conversation than a formal presentation, your goal is to smoothly go through the correct solutions without a lot of prompting. If you present problem 2 then choose one of the Aspect, Grangier, and Roger experiments and present the full computation of the probability, thus demonstrating how the mathematics of interference is used. I am happy to talk through this and other questions before we meet.
